

Kernel Module Implementation Checklist

- **Memory Manager**
 - **Basic Features**
 - * Stack allocation
 - * Heap allocation
 - **Intermediate Features**
 - * Stack deallocation
 - * Heap deallocation
- **Process Manager**
 - **Basic Features**
 - * Process table
 - * Process creation
 - * State transition
 - * Process termination
 - **Intermediate Features**
 - * Utility functions to get process-specific information
- **Scheduler**
 - **Basic Features**
 - * Clear scheduling policy
 - * Context switch
 - **Intermediate Features**
 - * Configurable time quantum
